

INTRODUCTION

As the COVID-19 situation in France continues to evolve and the local regulations and resources adapt to new realities, the committee has updated this Info Sheet to reflect the current situation

As always, please continue to **use the many links and references in the following text to verify, confirm and update the information in these pages**, as the situation continues to change, and new information is often available soon after publication of the Info Sheet.

SUMMARY OF CHANGES CURRENTLY IN EFFECT SINCE LAST FACT SHEET OF December 8, 2021:

- New rules for self-isolation if vaccinated and with a positive test: The Covid positive person self-isolates a minimum of five days from date of first symptoms or positive PCR. If on day five they test negative for Covid, they may end their isolation period. If they test positive, they must continue to self-isolate for another two days (seven days total). They do not need to retest at the end of the seven days.
- Testing requirements: It is no longer mandatory to perform a PCR test to confirm a positive antigen test.
- However, a PCR test is still required after a positive self-test.
- Pass Vaccinal replaces the Pass Sanitaire; as of Jan. 24, 2022 a third dose of the Covid-19 vaccination (or booster) is required to have a valid pass. A negative test if unvaccinated will no longer be valid to obtain a Pass Vaccinal.
- Mandatory masking outdoors no longer mandatory from Feb. 2nd on with some exceptions in heavily dense areas.
- Mandatory telework 3 days per week when possible until February 2, 2022
- School protocols have been simplified

SECTION 1: INTERNATIONAL MOBILITY

Who is authorized to travel to France?

As January 14, to control the spread of the virus and its variants new measures at the borders have been temporary taken.

All travelers must present a negative PCR or Antigen tests 24h or 48h prior to arrival according to the country they come from.

The only exception is fully vaccinated travelers coming from the European Union and Schengen Area countries (including Andorra, Iceland, Liechtenstein, Monaco, Norway, San Marino, Switzerland, and the Vatican)

Two main factors impact the travel restrictions:

- Whether the traveler is vaccinated or un-vaccinated
- Where the traveler is coming from: the color-coded classification according to the level of COVID in each country

Countries are listed as **Green**, **Orange/Amber**, **Red**, and **Scarlet Red**, depending on the level that COVID is circulating and the status of dangerous variants in each country. Different travel requirements are associated with each group.

Color Codes as of January 13

Green: no or little viral circulation:

- European Union and Schengen Area countries (including Andorra, Iceland, Liechtenstein, Monaco, Norway, San Marino, Switzerland, and the Vatican), plus Argentina, Australia, Bahrein, UAE, Hong-Kong, Kuwait, Japan, Qatar, New Zealand, Rwanda, Saudi Arabia, Senegal, South Korea, Taiwan, Uruguay and Vanuatu.
- **Vaccinated** travelers from following Green countries (European Union and Schengen Area countries (including Andorra, Iceland, Liechtenstein, Monaco, Norway, San Marino, Switzerland, and the Vatican) can travel freely to France without PCR testing prior to travel. They must provide proof of full vaccination and a sworn statement that they don't have COVID symptoms and haven't been in contact with someone with COVID in the past 14 days.
- **Vaccinated travelers from other green countries** must provide a negative Antigen or PCR result (test taken less than 48h of boarding).
- **Non-vaccinated** travelers from the European Union and Schengen Area countries must present a negative PCR or antigen test of **less than 24 hours** prior boarding. (from Andorra, Iceland, Liechtenstein, Monaco, Norway, San Marino, Switzerland, and the Vatican included)

Orange/Amber: a moderate and "controlled" level of viral circulation:

- All countries that are not currently classified as "Green" or "Red", including the U.K.
- **Vaccinated** travelers from Orange countries must present a negative PCR or antigen test less than 48h prior to boarding. They must provide proof of full vaccination and a sworn statement that they don't have COVID symptoms and haven't been in contact with someone with COVID in the past 14 days.
- **Non-vaccinated** travelers must adhere to the following requirements to travel:
 - A compelling reason for travel to France (see list below)
 - A recent negative test result (PCR or antigen within 48h to 24h of boarding).
 - Must provide a sworn statement they don't have COVID symptoms and haven't been in the presence of someone with COVID in the past 14 days.
 - A sworn statement that you shall take an antigen or biological screening test upon arrival in Metropolitan France
 - A sworn statement that you shall self-isolate for a period of seven days and
 - A sworn statement to take a virological (PCR) screening test at the end of the isolation period.
- Compelling reasons that allow **non-vaccinated** travelers to enter France include (among others):
 - Students registered at an institution of higher ed for programs in France of over 90 days.
 - Researcher (and family) coming to France at the invitation of a research lab for work that must be done in person.
 - Travelers in transit through France for under 24 hours in international zones
- **Lightened health control measures between France and the UK**
 - All travelers, vaccinated or not, must initially present a negative test (PCR or antigen test) of less than 24 hours.
 - For vaccinated travelers, there is no longer any obligation to justify a compelling reason for coming to France, nor any obligation to respect a period of isolation upon arrival on national territory. As such, the need to register, prior to travel, on the "passenger eOS" digital platform has been lifted. Arrival screenings may be conducted at the places of arrival. If the result is positive, the traveler will be placed in isolation.
 - For unvaccinated travelers, travel from the United Kingdom is authorized subject to being able to justify an overriding reason valid for "[red](#)" countries .

Red: a high level of virus circulation and of COVID variants - travel is discouraged:

- Afghanistan, Belorussia, Botswana, Eswatini, Democratic Republic of Congo, Georgia, Lesotho, Nigeria, Malawi, Mauritius Island, Moldavia, Montenegro, Mozambique, Namibia, Pakistan, Russia, Tanzania, South Africa, Surinam, Turkey, and Ukraine, **United States of America**, Zambia, Zimbabwe.
- **Vaccinated** travelers from Red countries must present a negative PCR or antigen Covid test less than 48h prior to travel. They must provide proof of full vaccination and a sworn statement that they don't have COVID symptoms and haven't been in contact with someone with COVID in the past 14 days.
- **Non-vaccinated** travelers must adhere to the following requirements to travel:
 - A compelling reason for travel to France
 - A recent negative test result (PCR or antigen within 48h)
 - Systematic COVID testing upon arrival at the airport
 - Quarantine for 10 days under supervision by authorities

Scarlet Red: High level of virus circulation and of highly new transmissible variant.

- No more countries are classified as Scarlet Red at the time of publication
- Vaccinated and unvaccinated travelers from Scarlet red countries must adhere to the following requirements to travel:
 - A compelling reason for travel to France
 - A recent negative test result (PCR within 48h or Antigen within 24h)
 - Systematic COVID testing upon arrival at the airport
 - Quarantine for 10 days under supervision by authorities

Websites where details and updates can be found:

<https://www.interieur.gouv.fr/Actualites/L-actu-du-Ministere/Certificate-of-international-travel>

What is required to travel from the U.S. to France?

The U.S. is currently coded as a **Red country**.

Travelers who are **VACCINATED**:

- Must show proof of complete vaccination cycle
- [Must present a negative PCR or antigen test less than 48h prior to boarding](#)
- Must provide a sworn statement they don't have COVID symptoms and haven't been in the presence of someone with COVID in the past 14 days. <https://www.interieur.gouv.fr/Actualites/L-actu-du-Ministere/Certificate-of-international-travel> and <https://www.campusfrance.org/fr/venir-en-france-informations-aux-etudiants-et-chercheurs-internationaux>

Travelers who are **NOT VACCINATED**:

- Must show a PCR or Antigen negative test result less than 48 hours max before flight departure
- Must provide a sworn statement they don't have COVID symptoms and haven't been in the presence of someone with COVID in the past 14 days. <https://www.interieur.gouv.fr/Actualites/L-actu-du-Ministere/Certificate-of-international-travel> and <https://www.campusfrance.org/fr/venir-en-france-informations-aux-etudiants-et-chercheurs-internationaux>
- Must commit to taking an Antigen test upon arrival
- Must quarantine for 10 days and follow up with a PCR test at the end of the quarantine
- Must have a compelling reason to enter France (see page 1)

Engagement sur l'honneur :

The sworn "Statement of Honor" template can be found here: <https://mobile.interieur.gouv.fr/Actualites/L-actu-du-Ministere/Certificate-of-international-travel>

Vaccinations that are accepted for entry into France: **Pfizer, Moderna, AstraZeneca** and **Johnson & Johnson**
<https://www.ema.europa.eu/covid-19-vaccines> and <https://www.diplomatie.gouv.fr/en/coming-to-france/coronavirus-advice-for-foreign-nationals-in-france/>

Proof of vaccination must be produced and must attest to a full vaccination cycle

- One can travel 1 week (7 days) after the second injection for Pfizer, Moderna and AstraZeneca
- One can travel 2 weeks after the single injection for those who have recovered from COVID
- One can travel 4 weeks (28 days) after the injection of J&J

Student Visas

The Campus France FAQ gives detailed information concerning the current status for U.S. students and non-U.S. students coming to France from the U.S. <https://www.usa.campusfrance.org/covid-19-faqs>

- Students traveling to France for short-term programs of under 90 days do not need a visa if they are U.S. citizens (regardless of vaccination status). Non-US-citizens should verify whether or not they need a short-stay visa.
- Students traveling to France for longer programs of over 90 days must [apply for a student visa](#).

All VFS Centers in the U.S. are open and accepting student visa appointments for students planning to study in France. French Consulates continue their service of delivering visas to international students enrolled in studies in France. https://france-visas.gouv.fr/en_US/web/france-visas/welcome-page

Leaving France & entering the United States

France requires all passengers leaving the EU to comply with the restrictions for international travel which are based on the color classification of the country of destination. Starting December 6, all air passengers, regardless of vaccination status, must show a negative COVID-19 test taken **no more than 1 day** before travel to the United States. Alternatively, travelers to the United States may provide documentation from a licensed health care provider of having recovered from COVID-19 in the 90 days preceding travel, called a Certificate of Recovery.

Vaccinated persons wishing to leave France to travel to a country outside the EU that is currently classified as **Red country** don't need to provide a compelling reason. They are strongly advised to inquire about entry requirements and/or restrictions in the country of destination.

Non vaccinated persons wishing to leave France to travel to a country outside the EU that is currently classified as **Red country** must fill out the Certificate to leave Metropolitan France and must provide a compelling reason for their trip. U.S. citizens and residents will not be prevented from leaving French territory. Travelers wishing to go to a **Red Country** should inquire about entry requirements before departure. <https://www.interieur.gouv.fr/Actualites/L-actu-du-Ministere/Certificate-of-international-travel>

Certificate to leave Metropolitan France :

- As November of 8, the United States permit entry from persons coming from the European Schengen Area who are not U.S. citizens. Details and exceptions listed here: <https://travel.state.gov/content/travel/en/traveladvisories/ea/requirements-for-air-travelers-to-the-us.html>
- This order applies to all air passengers, 2 years of age or older, travelling into the U.S., including U.S. citizens and legal permanent residents.
- Test must be a viral test (NAAT or antigen test). The CDC offers here a checklist of tests and/or documents necessary for air travel to the US:

<https://www.cdc.gov/coronavirus/2019-ncov/travelers/testing-international-air-travelers.html#general>

Upon entry in the U.S., the [CDC recommends](#), but does not currently require:

For **Vaccinated** Travelers

- Getting a new COVID test 3-5 days after travel & self-monitoring for COVID symptoms

For **non-vaccinated** Travelers

- Getting a new COVID test 3-5 days after travel, and a self-quarantine period of 7 days or 10-day quarantine if you do not get tested upon return.
- Self-monitoring for COVID symptoms & avoiding people at increased risk of illness for 14 days.

Travelers should look into local and state recommendations or requirements in the U.S. by accessing this travel planner: [CDC COVID Travel Planner](#)

SECTION 2: HEALTH SERVICE ACCESS & CAPACITY

Access to protective equipment (masks, gloves, gel, at-home tests)

All pharmacies and most grocery chains in France currently have low priced equipment available.

- **Disposable surgical masks** are available at approximately 10 - 40 centimes each.
- Certified 'Grand Public' **re-usable masks** cost about 2 euros each and come in 2 different categories: Category 1 masks filter approximately 90% of particles and Category 2 masks filter 70%. Annex 3 of the National Protocol for Staying Healthy & Safe at Work states that only official PPE, surgical masks or Category 1 masks should be worn in public. [National Workplace Protocol \(French\)](#)
- **Disinfectant gel** costs about 10-12 euros per liter. There are also public gel dispensers (free) in some cities in France, and almost all places of business have gel dispensers available for customer use.
- France currently has sufficient **protective gloves** available for the general public.
- **At-home antigen tests** are available in pharmacies (around 5,20 euros/test) and supermarkets (at cost, around 2 euros/test). Supermarkets are authorized to sell the self-administered tests through 31 January 2022, at which point this decision will be re-evaluated.

Self-isolation and/or quarantine period – unvaccinated travelers

There is an obligatory self-isolation period of 7 days for the arrival of the following unvaccinated travelers:

- 7 days of self-isolation + recognized [compelling reason for travel](#) + negative PCR test taken no more than 24 hours prior to travel or negative antigen test taken no more than 48 hours prior to travel + random antigen testing upon arrival at port of entry for non-vaccinated people coming into France from an [Orange/Amber](#) country. A negative PCR test is necessary to end the self-isolation period.
- 10 days of quarantine, under supervision of authorities + [compelling reason for travel](#) + negative PCR or antigen test taken no more than 48 hours prior to travel and antigen test taken upon arrival at port of entry for unvaccinated people coming into France from a [Red](#) country. The USA has been a red country since January 2, 2022.

The state health insurance website, [Ameli.fr](#) gives detailed advice (in French) for limiting contact with others and keeping living conditions clean during self-isolation.

Access to health care & hospitalization

- The platform [mesconseilscovid.sante.gouv.fr](#) allows anyone with symptoms to obtain within 3 minutes personalized advice as to how to proceed (for treatment, testing, etc.) and how to protect oneself and others.
- Web-based platforms and apps such as <https://www.doctolib.fr/>, <https://vitemadose.covidtracker.fr/> allow students to book medical appointments, PCR tests and vaccination appointments across the country with ease. Video consultations and in-person appointments with general practitioners are readily available as early as same day.
- Same day house-calls are also available in most French cities (through services such as *SOS Médecins* or UMP). <https://www.sosmedecins.fr/> and <https://www.ump.fr/>
- Students have access to all French public hospitals where there is a dedicated space for COVID patients.
- **French Hospitals are currently at 74% capacity (on January 23, 2022)** for intensive care/*reanimation* beds. Statistics can be tracked here: <https://dashboard.covid19.data.gouv.fr/vue-d-ensemble?location=FRA>

Access to testing

For costs: <https://www.service-public.fr/particuliers/actualites/A15235>

Saliva Test: Covid-19 saliva tests are not for sale to the general public but widely used in primary and secondary schools as well as universities.

Antigen Test: Available in pharmacies, airports, done onsite. Rapid results. Fee charged: approximately 25 euros, 30 euros if done on a Sunday. Patients on French National Health can access for free if prescribed for medical reasons, and/or if patient has completed a vaccination cycle.

PCR test: done by appointment in certified laboratories. Free if prescribed for medical reasons by health care professional for those on French National Health. <https://www.sante.fr/coronavirus-covid-19-questions-et-reponses-sur-les-tests-de-depistage>

At-home self-testing kits: At-home antigen tests now available in pharmacies (around 5,20 euros/test) and supermarkets (at cost, around 2 euros/test). Supermarkets are authorized to sell the self-administered tests through 31 January 2022, at which point this channel of distributed will be re-evaluated.

Immunity Test (blood test) available in France to determine if patients has developed immunity to COVID. These tests are done by medical prescription in labs.

Steps to take for testing

Precise procedures have been put in place for different case scenarios. Details can be found and downloaded here: [Steps to Take to be Tested](#)

- I don't present any symptoms and I would like to be tested: no prescription needed, PCR results within approximately 24h, Antigen test results in 15-30 min. Fee for test unless patient has a completed vaccination cycle and is affiliated with French National Health.
- I have symptoms: specific protocol for testing to avoid contact with others during testing and until results are in. PCR results within approximately 24h, Antigen results in 15-30 min. Fee for test unless patient has been identified by French National Health as a contact case, or has a completed vaccination cycle and is affiliated with French National Health.
- I have been in contact with a person who has tested positive: Antigen or PCR test available. Fee for test unless patient has been identified by French National Health as a contact case, or has a completed vaccination cycle and is affiliated with French National Health.
- A specific function is available through the website & application [Doctolib.fr](#) to locate the testing center or lab closest to you with the earliest available appointments for a test.
- Students who don't have French National Health have total access to testing but need to pay for the test and submit to their personal health insurance after if COVID testing is covered by their insurance policy.
- As of January 20: It is no longer mandatory to perform a PCR test to confirm a positive antigen test.
- However, a PCR test is still required after a positive self-test. <https://www.gouvernement.fr/info-coronavirus>

Tracking

LES NOUVELLES RÈGLES D'ISOLEMENT

Je suis vacciné complètement ou je suis un enfant de moins de 12 ans

Je ne suis pas vacciné ou pas complètement

JE M'ISOLE PENDANT 7 JOURS
Je peux réduire mon isolement à 5 jours si j'ai un test antigénique ou RT-PCR négatif et si je n'ai plus de symptômes depuis 48h.

JE M'ISOLE PENDANT 10 JOURS
Je peux réduire mon isolement à 7 jours si j'ai un test antigénique ou RT-PCR négatif et si je n'ai plus de symptômes depuis 48h.

JE SUIS POSITIF

PAS D'ISOLEMENT
Mais j'applique strictement les gestes barrières.
Je réalise un test antigénique ou RT-PCR dès que j'apprends que je suis cas contact, puis j'effectue des autotests à J+2 et J+4 après mon dernier contact avec la personne positive.
Si l'un de mes tests est positif, je deviens un cas et je m'isole.*

JE SUIS CAS CONTACT

JE M'ISOLE PENDANT 7 JOURS
À compter de la date du dernier contact. Pour sortir d'isolement je dois réaliser un test antigénique ou RT-PCR et avoir un résultat négatif.
Si le test est positif, je deviens un cas et je continue à m'isoler.

* Si mon autotest est positif, je dois confirmer le résultat par un test antigénique ou RT-PCR.

New self-isolation rules as of January 3, 2022

All COVID patients must provide a local doctor with the list of people with whom they have been in touch within 48 hours of the first symptoms. Medical authorities will contact every person on that list and provide them with further instructions (see above).

[New rules for self-isolation](#)

If vaccinated with a complete cycle: The Covid positive person self-isolates a minimum of five days from date of first symptoms or positive PCR. If on day five they test negative for Covid, they may end their isolation period. If they test positive, they must continue to self-isolate for another two days (seven days total). They do not need to retest at the end of the seven days.

Anyone who has been in contact with someone who has tested positive must follow a specific protocol <https://www.ameli.fr/paris/assure/covid-19/comprendre-le-covid-19-se-proteger/en-cas-de-contact-avec-une-personne-malade-du-covid-19> This link also contains the specific protocol if one has been exposed to the Omicron variant.

If you are not vaccinated and/or are immunocompromised:

- Wear a certified mask at all times when in contact with others, isolate immediately.
- Take an antigen test immediately. If negative, stay isolated 7 days after the last contact with the COVID patient.
- After 7 days take a PCR or antigen test
- Stay in quarantine for until the test results are in

If you are identified as a contact case, are fully vaccinated and not immune-compromised, you should:

- Perform a PCR or antigen test at day 0 (day when informed of exposure), day + 2 and day + 4.
- If negative, you are not required to self-isolate, but must respect social distancing, hand washing, and mask wearing in public.

Vaccinations

France's vaccination strategy: <https://www.gouvernement.fr/info-coronavirus/vaccins>

- Obligatory vaccination in certain professional sectors including health care and those in contact with vulnerable populations
- Vaccination open to all adults and minors over five years old.
- Booster vaccinations currently open to all adults over 18 years of age whose last COVID vaccination or infection dates from three months ago.
- Booster vaccination campaigns in retirement homes and for those over 80 living at home: dedicated phone number **0800 730 957**
- Vaccination strategy announcement for January 24, 2021
- The interval for the booster dose is reduced to three months after the last injection or infection with Covid-19.
- The vaccine booster is open to all persons 18 years and older. Starting January 24, it will be open to all adolescents aged 12 to 17 without obligation.
- Vaccination is open to all children aged 5-11 years and requires the agreement of both parents.

[Vaccination Dashboard](#)

People who have been vaccinated are still required to follow all COVID-19 protocols in private and public spaces, in workplaces and in schools.

accin COVID-19 **La dose de rappel : POUR QUI, QUAND ET OÙ ?**

Le rappel vaccinal est administré **dès 3 mois** après votre dernière injection, ou votre infection Covid-19 si celle-ci est survenue après votre vaccination.

Pour les personnes immunodéprimées, un avis médical est recommandé.

Montage	Masituation	Pfizer-BioNTech	Moderna
12 à 17 ans inclus	Je suis immunodéprimé, j'ai une pathologie à haut risque ou une comorbidité	<p>Je reçois une dose de rappel</p> <ul style="list-style-type: none"> • Médecin traitant (généraliste ou spécialiste) • Médecin d'urgence / Urgences • Pharmacie • Cabinet infirmier ou sage-femme • Centre de soins • Laboratoire de biologie médicale • Centre de vaccination • Lieu de travail 	
	Dans toutes les autres situations	Pour l'instant, il n'est pas éligible au rappel	
18 à 29 ans inclus	Quelle que soit ma situation	<p>Je reçois une dose de rappel</p> <ul style="list-style-type: none"> • Médecin traitant (généraliste ou spécialiste) • Médecin du Travail / Services de santé au travail • Pharmacie • Cabinet infirmier ou sage-femme • CHU / Centre de soins • Laboratoire de biologie médicale • Centre de vaccination • Lieu de travail

• Le rappel vaccinal se fait uniquement avec un vaccin à ARNm (Pfizer-BioNTech ou Moderna), quel que soit le ou les vaccins utilisés précédemment. Le vaccin Pfizer-BioNTech est recommandé pour les personnes de moins de 30 ans.
 • Pour les personnes ayant eu le Covid-19 avant leur injection de vaccin Janssen, la dose de rappel se fait 1 mois après la dose reçue.
 • Pour les personnes ayant eu le Covid-19 après leur injection de Janssen, 2 situations :
 - Si l'infection moins de 15 jours après l'injection : les personnes reçoivent une dose additionnelle de vaccin ARNm 4 semaines après l'infection. Elles sont éligibles au rappel vaccinal dès 3 mois après cette dose additionnelle.
 - Si l'infection plus de 15 jours après l'injection : les personnes n'ont pas besoin de compléter leur schéma vaccinal avec une dose additionnelle. Elles sont éligibles au rappel dès 3 mois après l'infection.

Pour connaître la liste des situations particulières et toutes les modalités de vaccination, rendez-vous sur : www.solidarites-sante.gouv.fr/publics-prioritaires-vaccin-covid-19

SECTION 3: RESTRICTIONS RELATED TO COVID-19

Current situation

All sectors of business, culture and society are open, excluding the following:

- Discothèques (until February 16)
- Concerts with a standing audience (until February 16)
- Any consumption while standing in restaurants, cafés or bars.(until February 16)

Masks and social distancing are required in all indoor spaces except while consuming.

The main restriction in place today concerns the Pass Sanitaire (which will be replaced by a Pass Vaccinal) and the obligation to show the pass to enter establishments and gatherings where large numbers of people share space.

Pass Sanitaire (Health Pass or Green Pass) to become Pass Vaccinal

What is the Pass Sanitaire?

The "Pass Sanitaire" or "Health Pass" is simply a paper or digital proof of protection from COVID-19. It consists of showing one of the following: <https://www.gouvernement.fr/info-coronavirus/pass-sanitaire>

- Proof of full vaccination (7 days after final dose of AstraZenica, Moderna and Pfizer within France, 7 days for travel within the EU and for anyone recovered from COVID with 1 dose, 28 days after J&J) <https://www.service-public.fr/particuliers/actualites/A14896>

N.B. As of January 15, 2022 proof of full vaccination will include the “booster shot”

A negative self-test taken under professional supervision (not valid for cross-border EU travel), PCR or Antigen test of less than 24h

A positive PCR test more than 11 days and less than 6 months old, or other official proof of recovery from COVID

Required Eligibility: The Pass Sanitaire is required for anyone 12 years old and over.

What is the Pass Vaccinal?

The “Pass Vaccinal” or “Vaccination Pass” will replace the Pass Sanitaire, requiring anyone in France seeking access to non-local public transport (planes, buses, trains), restaurants, bars, cafés or any public gatherings to show proof of having received the full cycle of vaccinations against COVID-19. It will be presented in the same way as the aforementioned Pass Sanitaire.

N.B. The Pass Vaccinal is set to take effect on Monday, January 24.

Required Eligibility: The Pass Vaccinal is required for anyone 16 years old and over.

Exemptions due to medical reasons

For those who have a medical reason impeding them from being vaccinated, a doctor’s certificate can be established as an alternative to the Pass Sanitaire and used to enter all restricted areas. <https://www.service-public.fr/particuliers/actualites/A15102>

The following reasons are the only accepted exemptions to not being vaccinated:

- Allergy to one of the components of the vaccination
- A grade 2 minimum anaphylactic reaction to the first dose of the vaccination
- Episodes of capillary leak syndrome
- Episodes of thrombotic and thrombocytopenic syndrome
- Post-COVID PIMS (Pediatric Inflammatory Multisystem Syndrome)
- A conclusion agreed upon by a medical committee that symptoms experienced after a first dose of the vaccination were too serious for a second dose

And two temporary counter-indications:

- Monoclonal antibody treatment against COVID
- Actively evolving myocarditis or pericarditis post vaccination

When and how do you use a Pass Vaccinal?

The Pass Vaccinal is required under the following conditions. Users must present either a paper form or a digital form of the pass to access any restricted event or venue:

- Since July 21, it is required in order to enter cultural venues or events with more than 50 people including concerts, museums, theatres, cinemas, etc.
- Since August 9, it is required for airplane and long-distance train/bus travel as well as cafes, restaurants, gyms, certain shopping centers and medical facilities.
- The Pass Vaccinal is not required for travel outside of France.
- Here is a detailed list (in French) of all places in France where the Pass Sanitaire is required: <https://www.service-public.fr/particuliers/actualites/A14896>
- <https://www.gouvernement.fr/info-coronavirus/pass-sanitaire>
- <https://www.gouvernement.fr/pass-sanitaire-toutes-les-reponses-a-vos-questions>

How do you get a Pass Vaccinal?

In France, vaccination and all test results are delivered with an official document that serves as the Pass Vaccinal. A QR code on that document allows users to scan their proof or results to the TousAntiCOVID app (see below under “Tools”) to produce a digital form of the pass.

Pass Vaccinal for non-locals

At the end of August, the French government announced the official procedure for vaccinated travelers from outside of the European Union to access and use the Pass Sanitaire. The following online platform manages the conversion of proof of vaccination into French/EU QR codes/passes for foreign students:

<https://www.demarches-simplifiees.fr/commencer/passe-sanitaire-etudiants> .

The health pass can be obtained in a pharmacy for 36€ with proof of your vaccination and your passport. A map with the names of addresses of pharmacies that will convert to the pass vaccinal are listed here:

<https://www.sante.fr/how-to-obtain-a-french-health-pass>

Please note that this conversion can only take place if the traveler can provide proof of full vaccination with EU approved vaccines : **Pfizer, Moderna, AstraZeneca** and **Johnson & Johnson** (<https://www.ema.europa.eu/covid-19-vaccines>).

Tools

In addition to consulting the general government websites that communicate all essential information concerning the virus and restrictions, everyone is asked to download the app **TousAntiCovid**, which serves several functions:

- **Tracking:** the app alerts users if they are in close contact with a Covid patient
- **Information:** the app publishes the daily stats concerning the virus
- **Testing:** the app can be used to locate the nearest testing center
- **Pass Sanitaire/Vaccinal:** the app generates a digital version of the Pass Sanitaire/Vaccinal by storing the QR code found on vaccination certificates and COVID test results acquired in France.

This app uses Bluetooth technology for tracking and does not share personal identification information. Use of the app for everyone, including COVID patients, is voluntary. [TOUS ANTI COVID Tracking App](#)

The French government has put in place a **24/7 hotline** (in French only) to respond to any questions concerning COVID-19 (health, regulations, workplace, social services, legal, civil, childcare and education, travel and leisure activities, etc.). A WhatsApp group managed by the government provides an additional Q&A source for anyone who wishes to join: [WhatsApp with Government](#)

Wearing Masks

As of January 20, 2022 masks, already compulsory indoors in all establishments open to the public, has been extended to certain city centers.

The wearing of a mask is mandatory from the age of 6 years old in public transport and in places receiving the public.

Travelers should consult local resources and authorities for details. <https://www.service-public.fr/particuliers/vosdroits/F35351>

It is still mandatory to wear a mask indoors and in public transportation, even when vaccinated, even when the pass sanitaire/vaccinal is required.

<https://www.gouvernement.fr/info-coronavirus/gestes-barrieres>

Schools

School protocols have been simplified. The objective is to keep schools open as much as possible. Thus:

When a positive case is detected in a classroom, parents will no longer be asked to pick up their child immediately, they can wait until after school.

When a positive case is detected in a classroom, children will be able to use 3 free self-tests (instead of one PCR test followed by two self-tests).

Finally, parents will no longer be asked to provide a certificate after each self-test: a single certificate will be required.

Higher Education

Frédérique Vidal, the Minister of Higher Education in France, had announced before the school year started that institutions of higher education would re-open for a 100% in-person academic year 2021/2022.

On December 6, 2021 the government announced a Level 3 of the health protocol in elementary school (mandatory wearing of masks in the playground and limitation of mixing in the canteen and of high-intensity sports activities indoors).

The rule of closing the class for a period of 7 days from the first positive case no longer applies to elementary school since the week of November 29: students who test negative within 24 hours can continue to attend class.

Middle school students from the 6th grade on who have a complete vaccination schedule can continue to attend classes. Non-vaccinated students must attend classes from home during the isolation period.

<https://www.gouvernement.fr/info-coronavirus>

The Ministry authorizes French institutions of higher education to organize classes as they see fit, either in-person and/or remote, but they recommend that priority be given to face to face instruction, in particular for discussion sections (“travaux dirigés”). Priority should also be given to the in-person instruction of 1st year and international students.

COVID mitigation techniques and social distancing are still to be maintained within all university spaces and the Ministry asked that all institutions put into place vaccination strategies and centers prior to the start of classes and to continue to make self-tests available to students.

The “pass sanitaire” is not currently required to attend school or university classes but is required for participation in extra-curricular activities (club sports, various student associations, events on campus, etc.).

Several official government websites give detail concerning academic and campus life during the COVID crisis.

- [Ministry of Higher Education general Covid info](#)
- Official student life website : Préparer ma rentrée 2021 : <https://www.etudiant.gouv.fr/fr/rentree2021>

International Students: International students continue to be welcomed into France provided they satisfy the French government’s current conditions of coming to France for participation in a short-term program or semester program (over 90 days). International students currently in France can apply for and/or renew residency permits, online, thus avoiding the previously obligatory in person appointment at the *prefecture*. ([Campus France Stay Permit Renewal info](#)).

<https://www.campusfrance.org/en/renew-residency-permit>

Workplaces

On January 3, 2022, the government mandated, and extended to February 2, 2021

- 3 days of telecommuting per week when possible.
- Limiting face-to-face meetings.
- Postponement of greeting and new year’s ceremonies, farewell parties, etc.

- Workplace protocols in place since January 3, 2022 can be found here: <https://www.gouvernement.fr/le-protocole-national-pour-assurer-la-sante-et-la-securite-des-salaries-en-entreprise-au-3-janvier>

After February 2, 2022, 3 days per week of telework is no longer mandatory but is recommended.

The following protocols are advised in the workplace

- Physical distancing (at least 1 meter between individuals and/or workstations, and **2 meters during coffee breaks and/or meals**)
- Obligatory mask wearing (in closed and/or shared spaces) and the responsibility of the employer to provide masks. **Only Category 1 cloth/fabric masks or disposable medical/surgical masks are authorized. N95 Masks are recommended.**
- The promotion of regular, thorough handwashing
- Regular mechanical or manual ventilation of the premises 10 minutes every hour
- Routine disinfecting at least once a day of all surfaces and objects
- Meetings should still take place virtually when possible but if in person, physical distancing recommendations (1 meter between individuals) should be respected. Moments of “conviviality” are authorized if there are no more than 25 people involved, the *gestes barrières* are respected and that the event takes place preferably outside.
- Management of the flow of people to avoid excessive crowding and crossing of individuals

Employees are instructed to stay at home should they develop Covid symptoms or if they have recently been in contact with someone who has tested positive for the virus and they are a high-risk contact person (non-vaccinated and/or immunocompromised). **Obligatory temperature checks or PCR tests** at the workplace are not authorized.

Gatherings, Socializing & Cultural Activities

There are no longer any capacity limits in place for socializing in a group in public or in private. <https://www.gouvernement.fr/info-coronavirus/questions-reponses#derogations> **Discotheques are closed for 4 weeks starting Dec. 9th**. They will reopen on 16 February. On the link below follow the evolving situation for outdoor events, restaurants bars, events and concerts <https://www.gouvernement.fr/info-coronavirus/loisirs>

Associated fines for not adhering to protocols

A **fine of 135 euros** may be applied in the event of non-compliance with COVID protocols such as wearing masks <https://www.service-public.fr/particuliers/vosdroits/F35351>. Repeat offenders can be fined up to **3,750 euros** and could risk 6 months of prison, community service, drivers' license suspension of up to 3 years maximum.

Local travel restrictions

Everyone **residing in France** must adhere to a few French regulations concerning mobility. The current situation allows and requires the following:

In France

- There are no restrictions for travel within continental France.
- For travelers to Corsica, a declaration of honor must be completed by passengers which must be printed and signed, will be required upon boarding by the transport company. Passengers must have completed a PCR test 72 hours before departure (or antigenic test, 48h before departure) or proof of complete vaccination. <https://www.prefectures-regions.gouv.fr/corse/Documents-publications/Salle-de-presse/Communique-de-presse/Covid-19-nouvelles-dispositions-applicables-avant-l-arrivee-en-Corse>
- For travelers to French overseas territories and departments, information concerning travel restrictions can be found here: <https://www.gouvernement.fr/info-coronavirus/outre-mer>

Further information is also available on the European Union website: <https://reopen.europa.eu/en/map/FRA>

Sports and exercise

The Ministry of Sports last updated safety protocols: <https://www.sports.gouv.fr/pratiques-sportives/covid19/Decisions-sanitaires-applicables-au-sport-a-partir-du-19-janvier-2022/>

Student Support

The Ministry of Higher Education & Research established during the 2020-2021 academic year a student mental health support website (with an English Language version) that compiles all the contacts and services related to mental health support for students during the COVID-19 crisis. The website covers all regions of France, and in addition to mental health support also serves as a resource for information about financial support, student housing, and health care. <https://www.soutien-etudiant.info/>

In addition, the government created in 20-21 a mental health care package (a “*chèque psy*”) to allow students in psychological distress access to free mental health support that they have renewed for 2021-22: <https://santepsy.etudiant.gouv.fr/>

Several Hotlines and free resources are available to students:

- A free 24/7 hotline monitored by the Association SPS (*Soins aux Professionnels de Santé*) for students has been opened and can be reached here: 0 805 23 23 36 <https://www.asso-sps.fr/>
- <https://www.nightline.fr/paris>, a student proposed/supported hotline to support peers (non-professional) is available everyday between 9pm to 2:30am: +33 1 88 32 12 32
- The BAPU (*Bureaux d'aide psychologique universitaires*) have psychologists, psychotherapists and psychiatrists available to students in need. Addresses and contact information can be found here: <https://www.etudiant.gouv.fr/fr/besoin-d-une-aide-psychologique-1297>
- [SOS Amitié](https://www.sos-amitie.fr/) at +33 9 72 39 40 50 (24/7 in French),
- [SOS Help](https://www.sos-help.fr/) +33 1 46 21 46 46 (3pm-11pm, in English)
- [Fil Santé Jeunes](https://www.fil-sante-jeunes.fr/) at +33 800 235 236 (9am to 11pm for ages 12-25).

[Ameli](#) has a list of additional resources.

City websites also list support specifically aimed to help the students studying there. Examples:

- In Paris: <https://www.paris.fr/pages/confinement-les-dispositifs-pour-les-etudiants-15717>
- In Strasbourg: <https://www.strasbourgimesesetudiants.eu/-/aide-pour-les-etudiants-du-territoire-covid19>
- In Aix en Provence: <https://www.aixenprovence.fr/Etudiants-vos-dispositifs-d-urgence>

On April 15, the government announced a special provision for 10 free sessions with a psychologist for children and adolescents between the ages of 3 and 17. <https://www.gouvernement.fr/forfait-100-psy-enfants-10-seances-sans-avance-de-frais>
